

# INDEX

## SYMBOLS

- \_** (underscore character), 942
- 16-bit Delphi**, capturing exceptions in, 271-272
- 32-bit integers**, 166-167
- 3G** (third generation) mobile networks, 1120
- 64-bit integers**, 168
- 802.11 technology**, 1120-1121

## A

- abstraction, example code**, 1023-1026
- access methods**
  - GetMaxLength() method, 388
  - SendMessage() method, 389
  - SetMaxLength() method, 388
- accessing**
  - field values, 314-315
  - Project Manager, 32
  - WebApp Debugger, 1082
  - WinHelp, 22
- accessories properties**, 105
- actions**
  - raAbort, 1015
  - raCancel, 1015
  - raCorrect, 1015
  - raMerge, 1015
  - raRefresh, 1015
  - raSkip, 1014
- Active property**, 301
- Active Server Objects**
  - ASP (Active Server Pages), 1050
    - in-process*, 1060-1061
    - out-of-process*, 1060-1061
    - overview*, 1050-1051
    - Request object*, 1051, 1061-1062
    - Response object*, 1051-1052, 1059-1060
    - running in response to HTML input*, 1063-1064
  - creating, 1052
    - CoClass Name*, 1055
    - Instancing options*, 1054-1055
    - New Active Server Object dialog box*, 1054
    - Object Context option*, 1055
    - Start In edit box*, 1053
    - Threading Model choices*, 1054-1055
  - debugging, 1071
    - using Windows 2000*, 1074-1076
    - using Windows NT 4*, 1073-1074
    - with MTS*, 1071-1073

- NetCLX support and, 1069-1070
- overview, 1050
- Page-Level Event Methods option, 1056
- recompiling, 1062-1063
- Type Library Editor, 1055-1059
- Active Server Pages.** See **ASP**
- ActiveIconHandle() method,** 751
- ActiveX**, 655-656
- ActiveX Data Objects.** See **ADO**
- Adapter Dispatcher component,** 1084
- Add Web Component,** 1036
- Add() method,** 403
- AddActivity() method,** 910
- adding fields, Fields Editor, 319
- AddInts() method,** 38
- AddObject() method,** 403
- AddRef() method,** 661-665
- AddText() method,** 704
- ADO (ActiveX Data Objects),** 298, 364
  - datasets, 300
  - dbGo for ADO, 364, 367
    - OLE DB provider for ODBC, establishing,* 365-366
    - TADOCommand component,* 372
    - TADOConnection component,* 368, 370, 375-376
  - Login prompt, bypassing, 370, 372
    - TADODataset component,* 373
    - TADOQuery component,* 375
    - TADOSToredProc component,* 375
    - TADOTable component,* 373-375
- ADTs (advanced data types),** 958
  - ADT client side listing, 963-965
  - ADT Ipas file listing, 959-961
  - ADT.idl listing, 958-959
  - implementation file for servers listing, 961-963
- advertising services, server setup,** 1004
- Advise() method,** 703
- Aggregation,** 672-673
- aliases**
  - IDL, 944
  - Object Pascal, 86
- Align property,** 436
- AlignControls() method,** 399
- AllocateHWnd() function,** 751
- Alpha CPU data structure, spinlock,** 200
- animated components, marquee components,** 494-495
  - animating, 498-510
  - destructor, 500
  - scrolling control, 501-502
  - writing, 495-497
- AnsiString type,** 51
  - migrating from Delphi 1, 57
  - Object Pascal, 52-56
- apartment option (Threading Model option),** 1054
- Apartment threading choice,** 1003
- API, tray notification icon,** 748-750
- AppBars (application desktop toolbars),** 764-766
  - component code, example code, 768-775
  - TAppBar, 776-779
  - VCL form encapsulation, 766-775
- AppBrowser navigation,** 30-31
- Application Adapter component,** 1083
